RE: Master Plan Committee

As the members of the Provo School District Board of Education, we wish to thank you for serving on the Master Plan Committee for our District. We consider your input and discussions to be invaluable in guiding the District's future plans and decisions.

As you begin the analysis of options for the Master Plan, we hope that you will also consider yourselves to have a separate important role – that is to seek to promote unity and understanding, not only within the Committee, but also within the community as a whole. Knowing of the diverse and tremendous capabilities and experience that you bring, we believe that you can together discover possibilities that will directly and indirectly benefit our students for a long time.

We encourage you to share your unique views and perspectives, and to listen thoughtfully to those of others. In these ways, we expect that your discussions will lead toward “win-win” possibilities for the good of the whole and to increased understanding and cohesion within our community.

We have a tremendous community in Provo with unique resources and wonderful people, and your work with the others for the common good will only make our community greater.
